

CERAMIC WASH & PROTECT

FAQ

<p>What's the benefit of using a wash with less foam, like Ceramic Wash & Protect than some other car wash formulas?</p>	<p>A lower foaming solution allows quicker, easier rinsing. Ceramic Wash & Protect also creates a water repellent film that causes water to bead off the surface, which helps you to dry faster.</p>
<p>Should I use warm or cold water with Ceramic Wash & Protect?</p>	<p>You can use warm or cold water, whichever you prefer. Avoid very hot water though, as it can cause the solution to dry on the vehicle surface.</p>
<p>Can I combine Ceramic Wash & Protect with Rapid Ceramic Spray or other car coating products?</p>	<p>Absolutely. Ceramic Wash & Protect is a perfect solution to top up coating protection in between other coating applications, to keep the shine on your car for longer.</p>
<p>What' the benefit of using Ceramic Wash & Protect over other car wash formulas?</p>	<p>Ceramic Wash & Protect is a 3 in 1 solution. It cleans you car, leaves behind a water repellent and protective film for quicker drying, and a smooth surface for high gloss finish.</p>
<p>Is Ceramic Wash & Protect pH neutral?</p>	<p>Yes, which means it's perfectly safe on polished, waxed and coated surfaces.</p>
<p>Is Ceramic Wash & Protect, wax & sealant safe?</p>	<p>Yes, Ceramic Wash & Protect will not wash away or strip wax or sealants. Even better, it will top up your existing wax or sealant.</p>
<p>Can I use Ceramic Wash & Protect on my windows?</p>	<p>Yes, Ceramic Wash & Protect is safe on all external surfaces. We always like to give the windshield a clean with Fast Glass as well.</p>
<p>Can I use Ceramic Wash & Protect on matt or satin paint?</p>	<p>We don't recommend Ceramic Wash & Protect for this application, since it increases gloss, and that's not something you want on a satin or matt finish. Instead, we'd recommend Foaming Car Wash, Bodywork Shampoo Conditioner, Polar Wash and even QuikRefresh.</p>

<p>Can I use Ceramic Wash & Protect on vinyl wraps and decals?</p>	<p>Yes it can, though if the wrap or graphics are satin or matt, Ceramic Wash & Protect will increase gloss, so please keep that in mind.</p>
<p>Does Ceramic Wash & Protect contain silicone?</p>	<p>Yes, a reactive silicone polymer is in the formula, and this is how Ceramic Wash & Protect is able to add that silky smooth shine!</p>
<p>How much Ceramic Wash & Protect should I use in my bucket?</p>	<p>3 caps full or 30ml in 10 litres of water is plenty.</p>
